SUMMARY

Software engineer with 2+ years of professional experience building consumer-facing web applications in React, TypeScript, and Node.js, including checkout, payments, and A/B tested features. Skilled in testing, code review, and collaborating across product, design, and engineering teams. Former high school math teacher with strong mentorship and analytical problem-solving skills.

TECHNICAL SKILLS

Languages | JavaScript, TypeScript, HTML, CSS, Python, SQL
Frontend | React, Redux, Next.js, React Native, Tailwind CSS, Styled Components
APIs & Backend | Node.js, GraphQL, REST APIs, Express.js
Data & Infrastructure | PostgreSQL, MongoDB, Firebase, Auth0, AWS, Vercel
Testing & Tooling | Jest, Mocha, Chai, Git, Jira, Confluence, Postman, Contentful, Optimizely, New Relic

WORK EXPERIENCE

Chegg | Software Engineer II — Commerce Web **Apr 2023 — May 2025**

- Rebuilt Chegg's checkout experience during the Recurly migration, integrating third-party payment APIs and SDKs with client-side tokenization and primary/backup payment method logic and digital wallets using React, TypeScript, and Node.js
- Engineered VPN-based region detection to localize pricing, surface compliance warnings, and block payment submission, preventing pricing bypass across ~4% of user subscriptions
- Owned localized KRW pricing logic across checkout, coordinating with backend, tax, and legal teams and A/B testing the rollout in Optimizely ahead of full launch to South Korean users
- Raised test coverage on critical checkout packages to 95%+ with Jest unit/integration tests and AI-assisted development tools including Cursor and CodeRabbit throughout development and code review
- Migrated 6 legacy packages from standalone repositories into Chegg's company-wide monorepo, consolidating shared tooling and dependencies across packages used by multiple engineering teams
- Defined Contentful content models and implemented GraphQL queries and mutations, ensuring data was structured and consumed correctly on the client side
- Drove code review standards, onboarded new engineers, and collaborated with cross-functional teams across the U.S., India, and Canada; periodically served as Scrum Master
- Monitored and resolved production checkout incidents during on-call rotations using New Relic

Carrollton-Farmers Branch ISD | High School Math Teacher & Algebra 2 Team Lead **Aug 2019 — Jul 2022**

- Created an interactive web platform using Canvas, HTML, CSS, and Desmos to centralize a year-long Algebra 2 curriculum for 170+ students annually
- Led curriculum planning for 4 math teachers during remote and hybrid instruction during the COVID-19 pandemic

PROJECTS

Merge **Jan 2023 — Mar 2023**

- Built a full-stack React Native mobile app for managing medical records from different healthcare providers in one place, designing REST APIs and PostgreSQL data models while implementing Firebase authentication and session management

Fuzzy Friends **Jan 2023**

- Led a team of 6 engineers in building a React MVP social networking platform featuring swipe-based user matching, authentication, scheduling, and messaging
- Developed the messaging component using TypeScript, React, Node.js, REST APIs, and MongoDB to enable communication between matched pet owners and persist chat history

Orchid **Oct 2022 — Dec 2022**

- Owned the product discovery experience for an e-commerce platform by developing reusable React components and implementing client-side state persistence
- Architected and deployed an Express and PostgreSQL backend on AWS EC2, tuning queries and adding database indexes to achieve ~1ms average query latency under 1000+ requests/second load tests

EDUCATION

Hack Reactor	Advanced Software Engineering Certificate (Full Scholarship Recipient)	**Oct 2022 — Jan 2023**
Texas Teachers	Texas Educator Certification, Mathematics 7-12	**May 2019**
The University of Texas at Austin	Bachelor of Science and Arts (BSA), Biochemistry	**May 2018**
